VALCOUR

CAPABILITY OVERVIEW

From initial design to finished work.

Manufacturing support spanning metalworking, fabrication, machining and additive processes. Custom requirements are reviewed for material, dimensions, quantity, finish and delivery needs.

CNC machining

- Prototype and production-part inquiries
- Milling, grinding and component work
- Ferrous and non-ferrous materials
- Drawing and tolerance review before quoting

Fabrication & welding

- Plasma cutting and sheet-metal work
- Finger-brake forming
- TIG, MIG and stick welding
- Custom welding, trailer and repair inquiries

Blacksmithing & ironwork

- Traditional and decorative forged metalwork
- Custom dimensions and repeat components
- Bladesmithing and heat-treatment inquiries
- Mild, medium- and high-carbon steel applications

Additive manufacturing

- Filament and resin printing
- Single- and multicolor printing
- CAD design and custom-print inquiries
- Curing, tempering and smoothing services
